Production & Time / Temperature Log

School: _____ Manager's Signature _____ Date _____

Instructions: Read the temperature at the beginning of each meal service and every hour thereafter using a calibrated thermometer. Record the product name, time, temperature, and any corrective action taken on this form. Check ACC if acceptable, UN if unacceptable. If food is not in the acceptable range, you must take a corrective action and document on this form. The foodservice manager will verify that foodservice employees are taking the required temperatures and following the proper preparation procedure by visually monitoring employees during the shift & reviewing, signing, and dating this log daily. Maintain this log for a minimum of 3 years.
