

Fresh from Hartwell, Georgia, StoneCreek Hydroponics grows premium hydroponic lettuces, lettuce mixes, and watercress. Their products are grown in water (hydroponics) without dirt, weeds, rocks, fertilizers and pesticides that typically accompany traditional farming methods. Hydroponic growing makes it possible to grow lettuce and other produce that is clean, safe, and highly nutritious.

Since 2010, StoneCreek Hydroponics has grown fine greens, herbs and lettuces for retail and hospitality usages in its 20,000 square foot greenhouse space.
