<sup>a</sup> Food items included in each food group and subgroup and amount equivalents. Minimum creditable serving is ¼ cup.

<sup>b</sup> One quarter-cup of dried fruit counts as ½ cup of fruit; 1 cup of leafy greens counts as ½ cup of vegetables. No more than half of the fruit or vegetable offerings may be in the form of juice. All juice must be 100% full-strength.

<sup>c</sup> For breakfast, vegetables may be substituted for fruits, but the first two cups per week of any such substitution must be from the dark green, red/orange, beans and peas (legumes) or “Other vegetables” subgroups as defined in §210.10(c)(2)(iii).

<sup>d</sup> Larger amounts of these vegetables may be served.

<sup>e</sup> This category consists of “Other vegetables” as defined in §210.10(c)(2)(iii)(E). For the purposes of the NSLP, “Other vegetables” requirement may be met with any additional amounts from the dark green, red/orange, and beans/peas (legumes) vegetable subgroups as defined in §210.10(c)(2)(iii).

<sup>f</sup> Any vegetable subgroup may be offered to meet the total weekly vegetable requirement.

<sup>g</sup> There is no separate meat/meat alternate component in the SBP. Schools may substitute 1 oz. eq. of meat/meat alternate for 1 oz. eq. of grains after the minimum daily grains requirement is met.

<sup>h</sup> Fluid milk must be low-fat (1 percent milk fat or less, unflavored) or fat-free (unflavored or flavored).

<sup>i</sup> The average daily amount of calories for a 5-day school week must be within the range (at least the minimum and no more than the maximum values).

<sup>j</sup> Discretionary sources of calories (solid fats and added sugars) may be added to the meal pattern if within the specifications for calories, saturated fat, trans fat, and sodium.

<sup>k</sup> The fruit quantity requirement for the SBP (5 cups/week and a minimum of 1 cup/day) is effective July 1, 2014 (SY 2014-2015).

<sup>l</sup> All grains must be whole grain-rich in both the NSLP and the SBP beginning July 1, 2014 (SY 2014-15).

<sup>m</sup> Beginning July 1, 2014 (SY 2014-2015), target sodium levels take effect (see table). Intermediate sodium specifications are established for SY2017-2018. Final specifications are to be reached by SY 2022-2023 or July 1, 2022.
