Accommodating Children with Special Dietary Needs in the School Nutrition Programs

Accommodating Students with Disabling Special Dietary Needs

Schools participating in a federal Child Nutrition Program (School Lunch, School Breakfast or After School Snack Program) are required to make accommodations for children who are unable to eat the school meals because of a <u>disability</u>* that restricts their diet. In order to make modifications or substitutions to the school meal, schools <u>must</u> have a written Medical Statement on file that is signed by a <u>licensed physician or other State licensed health care</u> professional authorized to write medical prescriptions under State law. The statement must identify:

- The child's disability
- An explanation of why the disability restricts the child's diet
- The major life activity affected by the disability
- The food(s) to be omitted from the child's diet
- The food or choice of foods that must be provided as the substitute

*Only a physician can declare if a student has a disability.

Responsibility of Parents

- Notify the school of any food allergy, disability or special dietary need.
- Provide Medical Statement completed by a physician (disability), a recognized medical authority (non-disabling special dietary need), or the parent (non-disabling special dietary needs for milk only).
- Participate in any meetings or discussions regarding the student's meal plan. Maintain a healthy line of communication with the school.
- Notify the school of any changes relating to the special dietary need (a new Medical Statement is required if the diet changes).

School Nutrition Program Responsibility

- Provide food substitutions for students according to Medical Statement. The school food service staff may not revise or change a diet prescription or medical order.
- Provide training to cafeteria personnel on how to properly accommodate students with special dietary needs. Maintain documentation of this training.
- Communicate with parents, staff, and medical authorities regarding diet modifications.
- Maintain Medical Statement on each student with a special dietary need. Diet orders are not required to be renewed on a yearly basis, however, the Georgia Department of Education recommends that you confirm, on a yearly basis, the diet order has not changed. If there are any changes to the diet, a new Medical Statement is required.
- If the school is opting to make a milk substitute available for non-disabling dietary needs, research products to ensure they meet the USDA nutrient standards for a milk substitute. Notify the Georgia Department of Education, School Nutrition Division if you are making milk substitutes available for non-disabling special needs.

School Nurse Responsibility

- Collaborate with School Nutrition Program Director, school staff, parents, and physician to appropriately share pertinent information, obtain a copy of Medical Statement, and accommodate students with special dietary needs.
- Develop medical plan of care as appropriate (Individualized Healthcare Plan).

•

Other Federal regulations

Based upon Federal laws that prohibit discrimination and ensure equal access to education, some students may have instructions for accommodating their special need written into a 504 Plan or an Individualized Education Plan (IEP). Typically, a team consisting of the school professionals and the parents collaborate to develop these plans. If the 504 Plan or IEP involves special dietary needs, the school nutrition program director should be involved.

Medical Plan of Care for School Nutrition Program (Students with Disabilities and Non-Disabling Special Dietary Needs)

The following child is a participant in one of the United States Department of Agriculture (USDA) school nutrition programs.

• USDA regulations 7CFR Part 15B require substitutions or modifications in school nutrition program meals for children whose **disability** restricts their diet and is supported by a statement signed by a **licensed physician or other State licensed health care professional authorized to write medical prescriptions under State law**. Food allergies which may result in a severe, life-threatening (anaphylactic) reaction may meet the definition of "disability."
