

In our efforts to improve the nutritional profile of our meals while continuing to meet the new breakfast and lunch program federal regulations. Here are some of the changes we've made:

- We offer fresh, seasonal salad bars daily
- ALL grain items are whole grain rich or whole wheat
- Introducing more "from scratch" items
- We offer fresh fruit and vegetables at both breakfast and lunch.
- New lower sodium items for breakfast and lunch to align with the National School Breakfast and Lunch programs.

Our lunchrooms offer a wide variety of choices and popular foods. We are striving, through careful selection and preparation, to make those favorite foods nutritionally sound and appealing to a diverse demographic population.

Food Services has been invited to be a FRESH-Meals@Schools Culinary Center for School Year 2014-15. Fresh, Regional, Education-Supportive Healthy Meals at Schools (FRESHMeals@Schools) Culinary Centers are school districts creating recipes for their schools and schools across the nation. The California Department of Education's Culinary Centers are led by 16 school district child nutrition services programs and located throughout California in culturally diverse neighborhoods, ranging in district size and food service operations. New exciting recipes will be kid tested and introduced throughout the LUSD District this coming year and will focus on today's student palates, regional foods and flavor profiles. Make sure you plan to come join us for lunch to see what's cooking!

## What's California Thursdays?

California Thursdays is an initiative to serve healthy, freshly prepared school meals made from California grown products!

As a large food service operation we have an exciting opportunity to partner with local growers and California businesses to invest in our student's health, the local environment and economy.
