

2016 – 2017 Food Service Update

Parents/Guardians

The MSD of Martinsville Food Service department has migrated from family meal accounts to Individual Student Meal accounts over the summer. During the change family meal account balances were divided up between all students attached to the family meal accounts. Moving forward all students will have their own individual meal account. This change has allowed us to adopt a charge policy that is more consistent across all grade levels. Here are a few helpful tips as your family adjust to the new Individual Student Meal accounts.

- List the amount you want applied to each student's account when sending in one payment from home.
- Make sure to monitor all student's meal accounts when using Family Access.
- Parent will have more control on how much each student spends.
- Parents will receive low balance & negative balance calls for each student's account.

In addition to individual meal accounts we have launched a new online payment platform at www.payments.msdofmartinsville.org. This program offers various payment for parents/guardians pertaining to both textbook fees and prepaid individual meal accounts. The sites allows for low balance emails to be set-up and auto re-load options when a payment method is stores.

Thanks for you allowing us to meet the nutritional needs of your students during the school day.
