

 **THIS CARTON IS RECYCLABLE TOO.**

PUSH THE STRAW BACK IN THE PACK TO REDUCE LITTER.

Visit www.recyclecartons.com to see where carton recycling is available in your community.

WHAT IS SHELF SAFE MILK?

SHELF SAFE milk has been specially prepared to keep it safe, delicious and nutritious without the need for refrigeration, additives or preservatives.

START WITH FRESH, NATURAL INGREDIENTS

UNIQUE PREPARATION THAT MAINTAINS INTEGRITY OF INGREDIENTS

INTEGRITY
Protected from harmful bacteria **without preservatives**

Unopened packages are safe for **months without refrigeration**

Favorite beverage is convenient & **easy to keep on hand!**

LAYERS OF PROTECTION
KEEP THE GOOD STUFF GOOD AND THE BAD STUFF OUT

Cartons also help protect natural resources and reduce climate impact!

Responsibly Sourced - Made mainly from renewable, plant-based materials.

Manufactured with Good in Mind - Made in factories that meet high environmental standards.

Recyclable - Can be recycled into new products such as green building materials and paper.

@TetraPakUSA

**SAME MILK,
DIFFERENT
PACKAGE.**

SAME MILK, DIFFERENT CARTON.

The milk in this new carton packaging provides the same nutritional benefits and great taste as the old package.

We pasteurize it at a higher temperature (ultra-pasteurization) for a shorter time, then put it in a Tetra Pak® carton that protects the milk from air and light. This keeps milk safe for a longer shelf life compared to ordinary paper cartons and all without preservatives and additives.

SCHOOLS SAVE MONEY AND REDUCE CARBON EMISSIONS.

Longer shelf life means less waste. We only need to refrigerate each day's supply and do not have to worry about spoilage.

There are distribution cost savings by receiving milk twice a month instead of 2-3 times a week.

Fewer deliveries mean fewer trucks on the road. That means we are reducing our carbon footprint.

SAME MILK, DIFFERENT PROCESS.
