

# Finger Limes

---

- Finger lime is a small, sausage-shaped citrus that comes in different colors, including red, yellow, brown, green, and black.
- They have little eggs inside where lots of juice is stored
- It is sour like a lemon, lime or grapefruit
- To eat simply cut in half and squeeze out the brightly colored pearls
- They pop when your teeth crush them and burst in your mouth like citrus pop rocks.
- It's just a lot of fun with everything!
