

Star Fruit

-
- Carambola is another name for Star Fruit
 - Star fruit is harvested when the green fruit has a tint of yellow.
 - When the fruit is cut crosswise, it forms a perfect star.
 - Star fruits do NOT need to be peeled or seeded-they can be eaten whole
 - Two varieties of star fruit are grown-tart and sweet
 - Star fruit has a texture like grapes and a taste that resembles a blend of pineapple, plum and lemon.
 - They are nutritious!
