This memo is to confirm that PROPLUS™ 500F, manufactured by The Solae Company, meets the requirements of Appendix A 7 CFR to Parts 210, 220, 225 and 226 for Alternate Protein Products. These requirements are:

1) This product is processed so that some portion of the non-protein constituents of the food have been removed. This product is a safe and suitable edible product produced from a plant source.

2) The biological quality of this protein is at least 80 percent that of casein, determined by Protein Digestibility Corrected Amino Acid Score (PDCAAS). The PDCAAS PROPLUS™ 500F is 1.0. Method to calculate is as follows:

   1. Determine protein content.
   2. Determine essential amino acid (EAA) content.
   3. Determine amino acid ratios by dividing the EAA content by the reference EAA content. (The reference EAA content we use is the FAO/WHO 2-5 year old amino acid pattern.)
   4. The lowest ratio is the uncorrected EAA score. (Typically 1.04 for Methionine + Cysteine).
   5. Determine digestibility. (97% for our soy proteins)
   6. Calculate PDCAAS by multiplying uncorrected EAA score by the digestibility. (1.04 x 0.97 = 1.0). Scores over 1.0 are rounded down to 1.0.

3) This product contains at least 18 percent protein by weight when fully hydrated or formulated. The maximum hydration ratio allowed for PROPLUS™ 500F is 3.77 parts water to 1 part PROPLUS™ 500F to achieve 18% protein by weight.

4) The protein content of PROPLUS™ 500F is 86% (as-is).

Your company may make applications to FNS/USDA based on this confirmation.

Sincerely,
