

## Canned Drinks and Fast Food in the Cafeteria

It is recommended that neither children nor adults bring canned or bottled drinks into the cafeteria, without the label being removed or covered with aluminum foil.

It is further recommended that children or adults bring no "fast food" into the cafeteria. If a parent brings his or her child "fast food", the food should be placed in a container other than the original container that promotes products which are in direct competition with the National School Lunch/Breakfast Program.

Food shall not be delivered to children or adults. "Fast Food" deliveries could be an introduction point for alcohol, drugs, or weapons to the campus. "Fast Food" deliveries could also pose a sanitation problem by introducing food borne illness or pests.

### Food Substitutions

Substitutions may be made in foods listed in the meal patterns if individual participating children are unable, because of medical or other special dietary needs, to consume such foods. Such substitutions shall be made only when supported by a statement from a recognized medical authority that includes recommended alternate foods. A copy of this medical statement shall be kept in the cafeteria of the school the child attends and the original maintained in the Food Service Office. A copy of the medical statement the physician needs to complete can be found on this web page under general information.
